

Changing Places, Spaces, and People: The Human Dimensions of Climate Change

ALL ARE WELCOME!!

Geography & Environmental Studies (GES) faculty will explore various aspects of the human dimensions of climate change and lead a discussion about the importance of the social sciences in a comprehensive understanding of this phenomenon. Each speaker will give a 10-minute presentation, followed by a general discussion.

Speakers:

Ting Liu: The Use of GIS and Spatial Data

Dennis Grammenos: Social Justice and Urban Geography

Alex Peimer: Policy and (Dis)agreements to Collectively Act

Melinda Storie: Why “Walking the Walk” is Challenging

Wednesday, January 31, 2018

7:05 – 8:15 p.m.

Golden Eagles Room

Student Union NEIU

This talk is part of the Community Conversations lecture series in which the College of Arts and Sciences and its faculty invite you to join us for conversations on the important and urgent topics of the day. All lectures are free. Parking permits required on campus at all times. For more information contact 773-442-5080.
